IDENTIFIERS *North Carolina

ABSTRACT

Official enrollment statistics are presented for the 58 institutions in the North Carolina Community College System, including detailed data for 1986-87 and summary data for previous years. Following introductory material and a glossary of terms, tables are presented, covering: (1) student enrollment by institution, quarter and program area, 1986-87; (2) student enrollment by program area, 1958-59 to 1986-87; (3) unduplicated headcount by program, 1986-87, 1985-86, and 1984-85; (4) curriculum program and extension students by age, race and sex, 1986-87; (5) student enrollment by race and sex by college, 1986-87; (6) geographic origins of students; (7) full-time equivalent (FTE) enrollment by quarter for 1986-87, and by program for 1970-71 through 1986-87; (8) FTE program enrollment by college; and (9) total average annual FTE, 1986-87. Charts and graphs illustrating data and trends are appended. (AJL)

FOREWORD

The Annual Enrollment Report, Student Enrollment and Full-Time Equivalents, 1986-87, provides the official enrollment statistics of the fifty-eight institutions in the North Carolina Community College System.

The information contained in this publication is utilized in the allocation of state appropriations to each institution and as input for numerous federal reports. Detailed enrollment data are shown for 1986-87 with summary data given for prior years. These data can be used to examine enrollment trends as one element in long-range planning activities.

Appreciation is extended to all those who participated in the tedious, but necessary, reporting procedures that make this report possible.

INTRODUCTION

This publication contains enrollment data for the 58 institutions in the North Carolina Community College System for the 1986-87 school year, summer quarter 1986 through spring quarter 1987. For comparative purposes, the totals for the 1984-85 and the 1985-86 school years are shown on most tables. Prior to 1970-71 the school year was defined as the period from the fall quarter through summer quarter. The tables on pages 6 and 39 show respectively historical student enrollment and FTE data. Distribution of enrollment for the 1986-87 school year is shown graphically on pages 40 through 77.

Sources of Data: There were four source documents from which data were collected. The curriculum and extension enrollment data cards, Form DCC 7-1 and DCC 7-2, completed by each student enrolled in the system provided the number of students enrolled and identified the curriculum program in which they were enrolled. Each student is counted only one time: see the definition of unduplicated headcount on page 4. The Institution's Class Report, Forms DCC 7-3C and DCC 7-3E, provided the number of FTE by major instructional area.

Calculation of Full-time Equivalents (FTE): Since many of the students in the Community College System attend class on a part-time basis, it is desirable to equate them to "typical" full-time students. The full-time equivalents (FTE), representative of the amount of time the "typical" full-time student would attend class, was the means developed to standardize reporting. Several part-time students constitute only one FTE.

One full-time equivalent (FTE) is a student in membership for 16 hours of class, shop, or laboratory per week for 44 weeks, the full four-quarter school year. To determine the average annual FTE, the total membership hours reported for the year is divided by 704. Student membership hours for a quarter divided by 176 produce full-time equivalents for a given quarter.

Terms and Definitions: The definitions shown below describe the terms used in this publication. Reference should be made to the North Carolina Educational Guide of Technical Institutes and Community Colleges for more detailed information regarding programs offered by the system.

Academic Extension Courses consist of single courses, each complete in itself, designed to serve the academic educational needs of adult citizens, including courses in humanities, mathematics and science, and social science.

Adult Basic Education (ABE) Programs includes courses at the elementary instructional level (through the eighth grade)--usually with emphasis on communicative, computational, and social skills--given to enable an adult or youth beyond the age of compulsory school attendance to raise his/her level of education, pursue a program of occupational training, and/or function more adequately as a citizen in a democratic society.

Adult High School Diploma Programs consist of classroom instruction, or learning laboratory courses, or a combination of both designed to qualify a student for an adult high school diploma under an Agreement of Affiliation with a local public school system or to qualify a student successfully to demonstrate competency in the General Educational Development Tests (GED) and to receive a High School Equivalency Certificate from the State Board of Community Colleges.

Average Annual FTE is the average FTE of the four-quarters of summer, fall, winter, and spring for a given year.

Avocational Extension Courses consist of single courses, each complete in itself, which focus on an individual's personal or leisure needs rather than his occupation, profession, or employment.

College Transfer Education Programs consist of planned academic curriculum programs leading to an Associate in Arts (A.A.), Associate in Fine Arts (A.F.A.), or Associate in Science (A.S.) degree and designed to allow for transfer to the junior year of a senior institution.

Curriculum Programs include College Transfer, General Education, Technical and Vocational programs. Special Credit Students are also included in curriculum enrollment.

Extension Programs include Adult Basic Education, JTPA (Job Training Partnership Act), New and Expanding Industry, and Self-Supporting Recreational programs in addition to the Regular Budget Extension program areas of Adult High School, Avocational Extension, Occupational Extension, Practical Skills Extension, and State Adult Basic Education.

General Education Programs consist of basic course work in English, literature, fine arts, philosophy, social science, science and mathematics leading to an Associate in General Education Degree (A.G.E.)or Certificate in General Education. They are designed principally for students who desire two years of general education beyond the high school level. This program is not principally designed for college transfer.

Human Resources Development Programs are intensive and unified efforts to recruit, train, and place in employment or, optionally, vocationally train chronically unemployed or underemployed adults. The primary objective of the training component is to help the jobless trainee reorient himself or herself to the world of work, appreciate the effects of his or her behavior on others, and develop the basic academic and communication skills prerequisite to obtaining and maintaining employment.

Learning Laboratory Programs consist of self-instruction using programmed texts, audio visual equipment, and other self-instructional materials. A learning laboratory coordinator has the function of bringing the instructional media and the student together on the basis of objective and subjective evaluation and of counseling, supervising, and encouraging persons working in the lab.

New and Expanding Industry Programs provide for the training needs of new industries which are moving into the state and also for existing industries undergoing a major expansion which result in the need for additional skilled manpower.

Occupational Extension Programs consist of single courses, complete in itself, designed for the specific purposes of training an individual for employment, upgrading skills of persons presently employed, and retraining others for new employment in occupational fields.

Practical Skills Extension Programs consist of single courses, each complete in itself, designed to provide practical training for persons pursuing additional skills which are not considered their major or primary vocation but may supplement income or may reasonably lead to employment.

Preparatory or Developmental Extension Programs includes Adult Basic Education, Adult High School, and Learning Laboratory programs.

Regular Budget Extension Programs includes Academic Extension, Adult High School, Avocational Extension, Occupational Extension, Practical Skills Extension and Adult Basic Education programs.

Regular Budget Programs include all programs in the Curriculum (College Transfer, General Education, Technical and Vocational) and Regular Budget Extension Areas (Academic Extension, Adult High School, Avocational Extension, Occupational Extension, Practical Skills Extension, and Adult Basic Education.

Self-Supporting Recreational Programs are self-supporting courses which the institution may provide at the request of the community but for which the institution receives no budgetary credit. Athletic, game and hobby courses fall into this category. The cost of such activities are borne exclusively by the participants or some contracting agency.

Technical Curriculum Programs are designed to prepare individuals for employment, and completion of the curriculum leads to an Associate in Applied Science (A.A.S.) degree. These programs involve the application of scientific principles in research, design, development, production, distribution, or service.

Unduplicated Headcount is the number of individuals enrolled in each curriculum or extension program. A student is counted in only one curriculum: therefore, the sum of the enrollment in each curriculum equals the total curriculum enrollment. However, in extension a student is counted in each extension program in which he is enrolled, but he is counted only once in each extension subtotal and extension total count regardless of the number of different programs in which he is enrolled. Because of this method of counting the extension enrollment, the sum of the enrollments in each program exceeds the total unduplicated extension count. Prior to 1971-72, extension students were counted only in the extension program in which they were first enrolled, regardless of the number of different programs in which they were enrolled.

Vocational Curriculum Programs consist of a series of courses which are designed to prepare an individual for employment in a specific occupation. These programs consist of a sequence of courses which generally can be completed in one year or less by a full-time student. Successful completion of a vocational curriculum program leads to a diploma or certificate.

*UNDUPLICATED HEADCOUNT is the number of individuals enrolled in each curriculum or extension program. A student is counted in only one curriculum; therefore, the sum of the enrollment in each curriculum equals the total curriculum enrollment. However, in extension a student is counted in each extension program in which he is enrolled, but he is counted only once in each extension subtotal and extension total count regardless of the number of different programs in which he is enrolled. Because of this method of counting the extension enrollment, the sum of the enrollments in each program exceeds the total unduplicated extension count. Prior to 1971-72, extension students were counted only in the extension program in which they were first enrolled, regardless of the number of different programs in which they were enrolled.
